Abstract (en)

The joint between the boards or panels (13,14) of wall and ceiling claddings is filled by a closure (10) where they would otherwise lock together with their tongue and groove profiles. It sits in place, in a snap fit, in the facing grooves (11,12) at the side edges of the boards (13,14). The joint closure (10) is of plastics or metal, and can be in a color matching the cladding boards.

Abstract (de)

Das Verschlusselement (10) eignet sich zur Anordnung zwischen zwei Brettern (13, 14) oder Platten einer Wand- oder Deckenverkleidung. Zur Montage oder Demontage kann es in gegenüberliegenden Nuten (11, 12) der Seitenränder der Bretter (13, 14) oder Platten lösbar einschnappen.
