Abstract (en)
[origin: EP0940556A2] A hand rail (1) for a ladder, comprising two longitudinal elements running in parallel, one of said elements (2,2") being attached to a side member (4) of the ladder, and the other element (5) being designed to operate as a guide rail for the user's hand, wherein fastening means (3,3') are formed to be mounted for clamping to the side member (4) as well as to the element (2,2") of the hand rail, concurrently holding the hand rail in a desired, adjustable inclination in relation to a general plane of the ladder, and in a desired extended, adjustable position in the longitudinal direction of the ladder. <IMAGE>
