Abstract (en)
[origin: FR2756736A1] The invention concerns an anhydrous solubilising/stabilising system, emulsifiable or microemulsifiable in water, for the solubilisation of hydrophobic N-sulphonyl indolin derivatives of formula (I) characterised in that it contains one or several constituents selected among amphiphilic compounds, non-ionic hydrophilic surfactants and non-ionic hydrophilic compounds having both amphiphilic and surface-active properties, being understood that said system contains either at least a mixture of an amphiphilic compound and a non-ionic hydrophilic surfactant, or a non-ionic hydrophilic compound having both surface-active and amphiphilic properties.
