Abstract (en)
[origin: WO9916594A1] The invention relates to a knife-holder (1) for circular knives (2) for longitudinally dividing lines of material. Said knife-holder has a base (3) which can be connected to a cutter bar, at least one moveable guiding rod (7) being allocated to said base (3). Said guiding rod (7) is connected to an actuating drive at one end and is connected by its other end to a swivel arm (30) via a joint. A knife head (17) with a circular knife is located on the swivel arm (30), said circular knife being arranged in such a way that it can rotate. The swivel arm (30) is also connected to an activating means (21).
