Abstract (en)  
[origin: WO9825035A2] The present invention relates to a control half-cable linking device (1) for linking a first (2) and a second (3) control half-cable. The linking device (1) comprises a first linking body (23, 24, 67) having at least one trough opening (61, 61', 75, 47), a second linking body (25, 26, 68) which is complementary shaped to said first linking body (23, 24, 67), to be at least partially insertable into said first linking body (23, 24, 67), said second linking body (25, 26, 68) having at least one groove (48, 64, 64', 78). Further, a locking element (49, 65, 65', 79) is provided having at least two appendix elements (50, 66, 66', 85) being arranged in substantially the same plane, at least one of which extending through said at least one trough opening (47, 61, 61', 75) of said first linking body (23, 24, 67) and engaging in said at least one groove (48, 64, 64', 78) of said second linking body (25, 26, 68) to provide for a detachable connection between said first (23, 24, 67) and said second (25, 26, 68) linking bodies.
