Abstract (en)

A wheeled suitcase or traveling bag with a built-in handle and variable transport setting, in which a portion of its frame holds a supporting element (17) bearing an internally fastened restraining and guiding element (18) suitable for receiving a handling element (13) extractable from an opening (23) provided in the suitcase or traveling bag, where the element (18) comprises a lower part (19) and an upper part (20) connectable to each other, the lower part (19) being permanently attachable (in 22) to the supporting element (17), and where a tubular section (24) can be inserted in the opening (23) so as to be lined up with the element (18) and locked in place from the inside with one extremity turned toward the inside of the handling element (13), fitted with an engaging mechanism capable of assuming upon compression two positions with respect to a bottom of the element (18), so that one extremity of the handle (33) is set opposite the opening (23) or slightly protruding toward the outside. <IMAGE>
