Abstract (en)
[origin: EP0941754A2] The tractor has a rotatably mounted loading shovel in the region of the radiator via a loading shovel linkage (8). There is a turning bearing for a telescopic arrangement (13) arranged below the turning bearing of the loading shovel linkage that has at least one operating lever on one side. There is a cam lug (19) of the telescopic arrangement slidingly gripped on the lower edge of the loading shovel linkage. The linkage may have a downward, open U-shaped configuration, with the front end of the arrangement inserted in the formed hollow space via the U-configuration.
