Abstract (en)

[origin: EP0941771A2] A demountable wall panel for assembling into a paint spray booth or similar lightweight structure has an elastic sealing frame (134) fitted around the edges of the panel. This enables the panel to be sealed into the support structure without adhesive/sealant. It also allows the panels to be removed and replaced without having to remove adhesive. The sealing frame can be made in one assembly with the panel or it can be applied to the panel using double sided adhesive tape.
