Abstract (en)
[origin: EP0941804A2] The grinder implement (22) is oscillated on a drive axle (16) fixed to the grinder. The grinder implement has a grinder plate (24) with at least two preferably convexly outwardly curved side edges converging in at least one corner. The grinder plate has a holder (25) for fixing to the drive axle and eccentrically mounted on the plate. The grinder plate is fixed by means of an adjustable connecting element comprising an elongated hole (26) through which a fixture element (38) is joined to the drive axle in various positions.
