Abstract (en)

[origin: EP0941819A2] A first bar (4) has laterally protruding pins (6) fitting through holes (7) in the saw-blade (1). The free ends of the pins form inward-sloping surfaces (15) and each fit into a cylindrical opening (8) in a second bar (5). The contact edge (16) faces each surface in the direction of pressure. The surface is formed by the outer surface of a truncated cone-shaped section (14) with its base (13) pointing outwards and next to a flange (12) on the pin.
