Abstract (en)

[origin: EP0941822A1] The hard metal cutter plates (2) are radially and axially fixed and detachably clamped onto the cutter head main body (1) by means of positioning pieces. The cutter head main body has a central hub part (12) with radially protruding arms (13). Each arm represents a support surface for a cutter plate. The interacting positioning pieces position the cutter plates axially and radially on the cutter head main body.
