Abstract (en)

[origin: EP0941826A2] A device for loading powders and coloured pigments into the cavity of a ceramic tile mould, comprising a usual loading carriage for transferring into the mould cavity the powder intended to form the tile body; said carriage comprises a first transverse hopper which is positioned in front of the loading compartment of said carriage and which, when the carriage is in one of its two end-of-travel positions, lies below a second hopper provided with a lower gate and fixed to the machine base, and having its upper opening traversed by a series of pigment micro-dispensers with to-and-fro movement. <IMAGE>
