Abstract (en)
A disc-shaped installation base (10) can be anchored to the door, with which the basic body (12) can be brought into engagement on a locating surface and is firmly connectable via connecting devices (34, 14). The installation base formed as a ring disc has a central breakthrough for an operating component (82) of the door fixture. The installation base has preferably two eccentric axial through fixture holes for accommodation of fixture screws (58). The central breakthrough of the installation base has an elliptical periphery and the fixture holes are arranged laterally from the central breakthrough on its smaller elliptical axis.

Abstract (de)
Die Erfindung betrifft eine Rosette für einen Türbeschlag mit einem eine zentrale Durchtrittsöffnung (44) aufweisenden Grundkörper (12) zur Lagerung eines Türdrückers (54) oder zur Abdeckung eines Türschlosses. Zur Vereinfachung der Montage ist ein an der Tür (56) verankerbarer scheibenförmiger Montagesockel (10) vorgesehen, mit welchem der Grundkörper (12) an einer Anlagefläche (64) in Eingriff bringbar und über Verbindungsmittel (34,14) fest verbindbar ist. <IMAGE>
