Abstract (en)

[origin: EP0942128A2] The arrangement denies entry after opening a lock on the door or frame if the break-in alarm system has not been switched unambiguously. The arrangement comprises a surface unit (1) and a stop piece (2). The surface unit contains an electrically actuated blocking element (3) and a component of a break-in alarm, especially the switch (4) or the magnet (5) of a magnetic contact. The surface unit has a mounting surface (7) suitable for mounting on a door or frame.
