Abstract (en)  
[origin: WO9822072A1] A pharmaceutical package for aiding or increasing patient compliance for the administration of a peroral complex pharmaceutical drug regimen, comprising: a) at least one blister card, wherein each blister card comprises the total daily dose of the peroral complex drug regimen to be administered by the patient; wherein the blister card is divided into sections separating each complex drug regimen dose; wherein each dose section comprises an indicia denoting the time in which the dose is to be administered; b) a patient information booklet comprising dosing information, side effect information, information describing the disease being treated, and patient incentive information; c) a daily calendar comprising dosing information, side effect information, information describing the disease being treated, and patient incentive information; and d) a reminder aid. The present invention further relates to a method of aiding and/or improving patient compliance for complex peroral drug regimens by the use of an effective compliance packaging. Especially preferred are compliance packages and methods relating to the treatment of H. pylori mediated upper gastrointestinal disorders or infections.
