Abstract (en)
[origin: WO9824701A1] Transport Packaging (1) for transport and/or storage, including a first and a second short side wall (2 and 3 respectively), a first and a second long side wall (4 and 5 respectively), a bottom (6) and an upper rim (7). The rim (7) includes a closed profile with a mainly square, rectangular or polygon-shaped cross section. The transport packaging (1) is provided with vertical profiles (8) at its short side walls (2 and 3 respectively) and/or at its long side walls (4 and 5 respectively). The profiles (8) are placed alone or in groups of two in connection to the corners (24, 34, 25, 35) between adjacent walls (2, 3, 4, 5). At least four of the profiles (8) are open with a U-shaped cross section closest to the rim (7) and are closed with a mainly quadratic, rectangular or polygon-shaped cross section closest to the bottom (6).
