Abstract (en)
[origin: WO9824966A1] The invention relates to a method for manufacturing a self-adhesive strengthening material, comprising the steps of: providing a coarse-mesh net consisting at least partially of strengthening fibres; at least partly encapsulating or impregnating the strengthening fibres of the net with a coating layer of adhesive resin; and making the resin non-adhering on one side of the net. The invention further relates to the thus obtained self-adhesive strengthening material and its applications.
