Abstract (en)
[origin: WO9824989A1] A dispenser suitable for attachment to the rim of a toilet bowl comprising a body (1) adapted to receive a block of product to be dispensed into the toilet bowl and a hook (2) attached to the body (1) for suspending the body from the rim of a toilet bowl. The body contains first and second body parts (4, 5) relatively rotatable about a hinge and at least one releasable catch for holding the body parts in a closed position. The body has at least three catches for holding the body parts in a closed position, the catches being releasable by simultaneous manipulation of three spaced locations on the dispenser.
