Abstract (en)
[origin: EP0943257A1] The bracelet comprises at least three rows of links (2,3,4). The links (3,4) of two lateral rows form with those of the central row (2) modular sets (17) which are articulated around transverse spindles (5,6). The two opposite lateral faces of the central link and the inner lateral faces of the lateral links of each set are fitted into each other by brazed on male and female parts (7,8). The parts for articulating adjacent modules are connected by locking screws (15,16) which hold the links of each set fitted into each other.
