Abstract (en)  
[origin: EP0943265A2] Each of the walls forming the box frame for a module (1,2) contains at least one hole pattern and at least one pattern of threaded fittings (4). Preferably the number of holes is equal to the number of threaded fittings. The system comprises two modules with different box frame dimensions and the same depth dimension. The modules are fitted side by side or on top of each other by engaging the threaded fittings on one module with the holes in the other module.
