Abstract (en)

[origin: EP0943552A1] For use of the mixed materials (2,3), via a removal aperture (4), an upper section (5.1) of the container (1.1) is axially displaceable. By means of a device (6.1) a dividing sheet (7.1) is cut and a lower section (8.1) is provided as container (9.1) of the first material. For the second material (3) a plug-type container (19) is provided, which is closed with the dividing sheet (7.1) in a fluid-tight manner. The plug-shaped container closes in a fluid-tight manner, with the upwardly arranged dividing sheet (7.1) and the throat area (20) of the lower container (9.1).
