Abstract (en)

[origin: EP0943577A2] The connecting tongue is for the connectable frame sections (1,2) which each include at least two aligned members. The members are spaced together extending through at least one cross strip connected profiles Each member end has a connector tongue (3), which is insertable in the other end of a coupled further section is insertable. The joints are held through connectors (4) passing through bores of the connecting tongues and the members. The connecting tongue insertable end (6) is shaped at least over a part of its limiting edges (9-11), one of which is the straight with respect to the inner separating extension.
