Abstract (en)
[origin: EP0943732A2] The head parts (8) of both rails have a preferably prismatic area (9) close to the foot and an area (10) remote from the foot with a contact surface (11) for the wheels. The contact surfaces in normal section to the rail longitudinal direction have a first and/or second curved profile curve, particularly with three part circles. The stand surface (6) of the rail (1,2) viewed normally to the rail longitudinal direction and in relation to the rail track has an inclination particularly of 1:40.
