Abstract (en)

[origin: EP0943752A1] In the assembly position the lower scaffolding board support section (3) lies close to the building facade (8), while the upper scaffolding support section (4) is laterally displaced relative to the lower section so that it lies further away from the facade. The extension part (1) is mounted on top of a section of the scaffolding, e.g. a vertical frame (2), and contains two scaffolding board support sections at different heights.
