Abstract (en)
[origin: EP0943753A2] The device consists of flat cladding elements (14) located on the inside or outside of the frame (12). Attachment units (16.1-16.4) have a first connection unit (18.1, 18.2) for connecting to struts or beams of the frame, and a second connection unit (20.1-20.3) for connecting to the cladding elements. The cladding elements have edge profile units (30) on their top and bottom edge regions. The second connection unit has at least one overhanging rod element (22) whose free end (24) points upwards or downwards which can be engaged in recesses in the edge profile elements.
