Abstract (en)

[origin: EP0944136A2] The connector arrangement has a base part (2) with connector modules and a connector module carrier that can be removably connected to and sealed w.r.t. it and which can be mounted via a seal on the edge region (5) of the separating wall enclosing the aperture. The base part is fixed onto the edge region on the dry room side by a clamp element with a moisture seal (6) and a sound seal (7). The module carrier is of one or more parts and is applied to the edge region on the humid room side and screwed onto the base part with one or more fixing bolts (17). A cover (12) has a cable inlet channel (14).
