Abstract (en)
[origin: WO9826590A1] An apparatus for outputting a VGA video signal comprises means for providing a clock signal on at least one of the three VGA analog colour signals. Also provided is a method generating a VGA video signal, the method including the steps of: receiving a video signal conforming to a VGA standard; providing a clock signal on at least one of these three VGA analog colour signals; and outputting the video signal with the clock signal provided. An image capturing apparatus is also provided.
