Abstract (en)
[origin: WO9535643A1] Electric baking oven having a case (1) housing a heating enclosure (2) with a roof (3) comprising a directed opening (4), a device (5) for measuring infrared radiation being mounted behind said opening. Said device (5) determines the temperature of a body (6) placed in the enclosure and includes an infrared sensor (7) mounted on a support (8) and having a housing (9) containing an infrared-sensitive element located opposite a sensing window (11). According to the invention, the infrared radiation measuring device includes means (13) for homogenizing the temperature of the housing (9) of the sensor (7) and the support (8).
