Abstract (en)
[origin: EP0945091A2] The presentation place has two side parts having hook elements (11), for suspending in a column of shelves, and on which on opposite standing side surfaces, has respectively a guide element (13). A compartment base is connected between the side parts, in order to present the appliances on it. A drawer is designed to push in on the guide elements at the two side parts under the compartment base. A safety unit (4) is designed to hold the drawer securely in a first position under the compartment base, in which an intermediate space stays open between the front of the drawer and the compartment base, for the passage of the electric cable of the appliance presented on the shelf base.
