Abstract (en)
[origin: EP0945098A2] The partition (10) is constructed from at least one wall panel (12), at least one door section (14) and a support frame (16, 22, 24, 32, 36). At least part of one wall panel is mounted in the frame so that it can be rotated about a horizontal axis which preferably extends parallel to the plane of the wall or a section thereof. Preferably the top or bottom end of the glass or plastic panel is held in a profile (28) which can rotate about the horizontal axis, or pivoting brackets are attached to the sides of the panel. The support frame comprises corner profiles (14), wall mounting brackets (22), posts (24, 26), door mounting profiles (32) and bow frames (36).
