Abstract (en)
A double-layer paper bag has a permanently-closed top fill opening (10) and a dispensing opening (26) formed in a side gusset wall (6) of the bag. A cover layer (18) is secured over the opening (26), and is peeled away before use. After use the opening (26) can be reclosed by folding together the gusset walls (6) and holding it in that folded condition by means of a releasable adhesive securement. In one version the cover layer (18) is used as a strap for this purpose, having an adhesive end which is wrapped around and stuck to the outer bag wall. Additionally or alternatively, an adhesive region (24) surrounding the dispensing opening (26) sticks releasably to itself when the gusset wall (6) is folded together. <IMAGE>
