## Abstract (en)

The distributor unit (3) on the transparent or translucent bottle (1) neck (2) has a plunger-tube (4) pointing towards the bottom of the bottle. The plunger tube is surrounded over at least part of its length by a casing tube (5) which has a longitudinal bore (19) intersected by the plunger tube. The bottle is at atmospheric pressure, and the distributor is in the form of a pump. The casing tube is fixed by an intermediate piece (6) inserted into the bottle-neck and which comprises a flange (15) resting on the rim (9) of the neck. A cylindrical skirt (14) has fixtures (17) on its inner surface near its opposite end to the flange. The fixtures cooperate with matching fixtures (20) near one end of the casing tube.

## Abstract (fr)

Récipient distributeur de produit fluide comportant un flacon (1) muni d'un goulot (2) sur lequel est fixé un organe distributeur (3), ledit organe distributeur étant pourvu d'un tube plongeur (4), qui s'étend vers le fond du flacon (1) pour alimenter l'organe distributeur (3), caractérisé en ce que le flacon est réalisé en matériau transparent ou translucide et en ce que le tube plongeur (4) est entouré, sur au moins une partie de sa longueur, d'un tube d'habillage (5) pourvu d'un alésage longitudinal (19) à travers lequel s'étend ledit tube plongeur (4). <IMAGE>
