Abstract (en)
[origin: EP0945551A1] The sweeping device comprises two brushes (1,2) which are vertically adjustable and mounted under the vehicle chassis. The first brush is placed at the rear of the vehicle near to a suction nozzle and the second in front of it. The rear brush is fixed in position after adjustment and the front brush is movable horizontally. The two brushes are pivoted together by a parallelogram structure (19).
