Abstract (en)

[origin: EP0945569A2] There is described a flexible connection device (1) for panelings, particularly for metallic panels (3) for fencings, composed of: a section bar (5) shaped as a C equipped with a projecting wing (7) with one hole obtained therein, the section bar (5) having obtained therein at least one pair of holes; a L-shaped bracket (9) that has obtained therein at least one hole for every arm, the bracket (9) being rotatably connected to the wing (7) and being adapted to be secured to a support rod (13) of the fencing; and securing means (15) placed in the holes in the section bar (5) and adapted to secure the section bar (5) to the metallic panels (3). <IMAGE>
