Abstract (en)
[origin: EP0945570A2] The lock plate assembly, as furniture for an outer door, has a tubular base component (11) with a removable mounting (27) inserted into it. When in place, the shaft section (28) of the mounting passes through the opening (24), and the head section (29) is supported by the edge round the opening at the inner plate (12) and at least partially in the hollow zone (17). The opening (25) of the outer plate (14), aligned with the opening (24), has a cross section to allow the head section (27) of the mounting (27) to pass through.
