Abstract (en)  
[origin: WO9824617A1] A method for forming three-dimensional soft shapes and packages of paper material, characterised by positioning at least one yieldable paper sheet (6, 12, 24) to face at least one aperture (4) provided in a support (2), securing said sheet to the surrounding edge of said aperture, then stretching said sheet to deform it inwards/outwards of said aperture to obtain a concave half-shell.
