Abstract (en)

[origin: DE19654167A1] The invention relates to a functionalized mixture of oligomers derived from cyclopentene and a method to produce same by transforming oligomer mixtures containing ethylene-unsaturated double bonds in one or several reaction steps. According to said method, oligomer mixtures derived from cyclopentene of the formula (I) are used as starting material, wherein n represents an integral number between 1 and 15 and R<1>, R<2>, R<3> and R<4> represent, independently of each other, hydrogen or alkyl. The invention further relates to the use of these oligomer mixtures.
