Abstract (en)

[origin: DE19652697A1] The present invention relates to the production and use of formulations consisting of (a) 10 to 90 wt.% cellulose; (b) 5 to 60 wt.% alkaline caseinate containing as polymer constituents (c) 5 to 85 wt.% polymer obtained from N-vinyl lactams or (d) 5 to 85 wt.% polymer obtained from 50 to 99.5 wt.% of at least one basic vinyl heterocycle with a pKa value of at least 3.8 or a mixture thereof. The present invention also relates to the use of these formulations in the treatment of biological liquids of vegetable origin in an unfermented, partially or completely fermented state for sensory stabilization of products with a view to preserving taste and color.
