Abstract (en)

[origin: WO9827167A1] The invention relates to a method for manufacturing paint for electrophoretic dip-coating made of aqueous binder dispersions. If needed, catalysts are added to these binder dispersions, as are one or several aldehydes of the general formula $R-CH=O$, or one or more compounds which release such aldehydes, R representing one hydrogen atom or an alcy group with between 1 and 10 C atoms.
