Abstract (en)  
[origin: WO9828399A1] The invention comprises a kit of parts which comprises, in combination: a) a shaped article comprising a sponge body having a first surface defining a pouch therein, said pouch being adapted to receive and retain a surfactant-containing composition, and, b) a surfactant-containing composition which comprises a particulate phase. The invention also relates to a method of surface cleaning using a sponge body having a first surface defining a pouch therein, said pouch being adapted to receive and retain a surfactant-containing composition which comprises the steps of: a) at least partially filling said pouch with a surfactant containing composition which comprises a particulate phase, and, b) performing a manual cleaning operation with the sponge.
