Abstract (en)
[origin: WO9816776A1] The present invention relates to a compressed-air cylinder provided with one or more sheaths consisting of a partial or total covering. The sheaths can be either used for instance as a support for markings, signs or stickings, or functionalized. They consist of foil, fabric or web. During the process of forming, the compressed-air cylinders are provided with one or more sheaths, at least one of which has printings, markings, signs and one or more stickings and is either transparent or unicolor or multicoloured or functionalized.
