Abstract (en)

[origin: US6193279B1] A label for labeling containers, preferably cylindrical containers. The label has at least one removable tag and an attachment for detachably attaching the removable tag. In particular, the label includes a base part having a first adhesive layer on its bottom side, and an overlapping part which at least partially covers the base part when the label is placed on the container. In this way optimum use of the jacket surface of a labeled container can be achieved.
