Abstract (en)

[origin: EP0947461A2] The conveyor has a cross-bar (2) positioned above the building element (1) and suspended from a hoist (6). The building element is surrounded by tensioning elements (3) such as bands. The cross-bar is directly placed on the building element by the tensioning elements, and has a contact point for joining it to the hoist. The cross-bar consists of two connected single elements joined by plug-in connections.
