Abstract (en)

[origin: EP0947644A2] Several parallel spaced locating areas (30,32,34) are provided for a view component (26). Two channels (16,18) for seam bands run at right-angles to one another and are between adjacent locating areas. The connecting component is formed as a crossing unit (10) and preferably has four locating areas. The channels run parallel to the fixture surface and the connecting component locates flatly in the fixture zone (20) on the fixture surface.
