Abstract (en)
[origin: EP0947762A2] The light (1) has a housing and at least one light source. The housing has a first part (3) contg. at least one opening (4) for the light source and an associated second housing part (5) which can contain. at least one opening (6) for at least one light source and a pivotable and/or linearly movable arrangement for simultaneously influencing the openings in the first and/or second housing parts. The housing parts can be pivoted and/or displaced w.r.t. each other.
