Abstract (en)

[origin: EP0947798A2] A process for the production of a camouflage material (I) for the visible, near infrared, far infrared and radar wavelengths comprises: (A) preparation of a carrier fabric (B) removal of processing aids and surfactants from the fabric and drying (C) application of a metal layer onto the fabric (D) application of a primer and camouflage paint onto the metal layer. An Independent claim is included for the resulting camouflage material (I) comprising a support fabric, a metal layer, a primer layer and a camouflage paint for infrared.
