Abstract (en)

[origin: EP0948016A2] The electromagnetic switch has a contact space receiving the stationary and movable contacts and a drive space receiving a magnetic drive with a magnetic core, an electromagnetic coil and a movable magnetic armature, for operation of the movable contacts, defined by a multi-part switch housing. The drive space housing (100) has a magnetic core housing frame (10) and a magnetic armature housing frame (20) fitted together, with a base plate (30) secured to the open underside of the magnetic core housing frame.
