Abstract (en)

[origin: WO9828015A1] The present invention relates to lipophilic topical adhesives for attachment to the skin. In particular the present invention relates to such topical adhesives which can be preferably employed for attachment to the skin in the area where absorption of bodily liquids is desired. The lipophilic topical adhesive provides secure attachment and is pleasing to the skin upon application, yet causes no discomfort upon removal. This is achieved by selecting the chemical composition and rheological characteristics of the topical adhesives.
