Abstract (en)
[origin: WO9820091A1] The invention relates to granular, denture cleansing compositions comprising an inorganic persalt bleaching agent, a silicone oil and a foam-forming surfactant selected from anionic surfactants, amphoteric surfactants and mixtures thereof, wherein the silicone oil and the foam-forming surfactant are in discrete granules. The compositions provide excellent de-stain activity with improved effervescence and/or tablet disintegration. They are especially suitable in tablet form as denture cleansers.
