Abstract (en)

[origin: WO9922067A1] The invention relates to a method and device for applying a liquid or pasty application medium on a running web of material, especially of paper or cardboard, in a twin wire area of a wet splitting device (33) of a paper machine. The inventive method is characterized in that an additional liquid or pasty application medium is applied on the web of material (38) by means of at least one applying device (14, 15, 16, 17, 25, 28, 31, 32, 36, 48, 52, 53) after a first press element (13) of the press section (34). The inventive device has the following features: an applying device (5, 10, 44, 46) is arranged in said twin wire area on at least one side of a wire (3, 4, 39, 40), said side being opposite the web of material; and at least one additional applying device (14, 15, 16, 17, 25, 28, 31, 32, 48, 52, 53) which directly faces the web of material is provided after a first press element (13) of a press section (34).
